

STEP Resources

The following is a list of different sources of STEP preparation material.

Admissions Testing Service

<http://www.admissionstestingservice.org/for-test-takers/step/preparing-for-step/> - This is the official STEP website and has all STEP information (e.g. entry deadlines and test dates) as well as all STEP papers (and official solutions and examiners' reports) starting from 1998. It also has the STEP specification which is essential to read early. This is the sole official source of STEP information.

Integral Maths

<http://integralmaths.org/> - This is a website that has model solutions to all STEP papers starting from 1996. These solutions are very useful and much more expansive than the official ones. You can log onto this website with the guest username and password below, with this login you can access all STEP and AEA model solutions. Some universities may give you a personal login to the website if you apply to them (UCL, Cambridge).

TSR

TSR has many different STEP threads that are changing all the time, some useful ones are:

<http://www.thestudentroom.co.uk/showthread.php?t=3963231&p=63533025#post63533025> - Some quite specific and very useful STEP tricks.

<http://www.thestudentroom.co.uk/showthread.php?t=3478331> - The 2016 STEP discussion forum, people discuss STEP questions here; there is a 'megapack' which has all STEP papers and markschemes as well as some old booklets all in one place which you may wish to download. There will be a new thread made for your year so you should find the appropriate one.

Physics and Maths Tutor

<http://www.physicsandmathstutor.com/step/> - This has some very old STEP questions.

nRich

<https://nrich.maths.org/10622> - This is a Cambridge website and has a collection of 24 STEP preparation modules which are useful to look through but are no substitute for doing questions.
