## Sponsor Message

Jane Street is a quantitative trading firm with offices worldwide. We hire smart, humble people who love to solve problems, build systems, and test theories.

We are actively recruiting for our Summer 2022 Internships in [Software Engineering](#), [Quantitative Trading](#), [Quantitative Research](#) and [Business Development](#).

We invest heavily in teaching and training. There's a library and a classroom in every office because deepening your understanding of something is considered real work. Guest lectures, classes, and conferences round out the intellectual exchanges that happen every day.

We have excellent facilities for interns, including free breakfast and lunch, fully stocked kitchens for snacks throughout the day, a private, on-site gym as well as a packed schedule of paid-for social events throughout the summer. Past events have included theatre trips, cooking classes, games nights and many more!

If you have never thought about a career in finance, you are in good company—many of us were in the same position before working here. If you have a curious mind, a collaborative nature, and a passion for solving interesting problems, we have a feeling you will fit right in.

People grow into long careers at Jane Street because there are always new and exciting problems to solve, systems to build, and theories to test. More than twenty years after our founding, it still feels like we're just getting started.

Our internships are aimed at penultimate year students expecting to graduate in 2023. If you are a final year student, you can find all of our full time roles [here](#).

You can also sign up to our [mailing list](#) to hear about future Jane Street events, including our Spring programs.
